

International Symposium on Earth-Science Challenges 2013

The 3rd Summit Between the University of Oklahoma and Kyoto University

Special session

- Earth-Science Challenges and Beyond

General session

- Advanced Remote Sensing Development and Observations
- Understanding and Prediction of High-Impact Weather
- Extreme Weather and Climate Variability for Mitigation

The 236th Symposium on Sustainable Humanosphere

October 3-5, 2013

*Obaku Plaza, Kyoto University
Uji, Kyoto, Japan*

<http://hmd.dpri.kyoto-u.ac.jp/kuou2013>

Sponsored by

Disaster Prevention Research Institute (DPRI), Research Institute for Sustainable Humanosphere (RISH), and Adaptation and Resilience for a Sustainable/Survivable Society (GCOE-ARS), of Kyoto University. Program for Risk Information on Climate Change (SOUSEI) of MEXT. The University of Oklahoma Office of the Executive Vice President, National Weather Center (NWC) and College of Atmospheric and Geographic Sciences (A&GS), Advanced Radar Research Center (ARRC), and School of Meteorology (SoM), of the University of Oklahoma. Japan Oklahoma Society.

Organized by

Kyoto University: Disaster Prevention Research Institute (DPRI), Research Institute for Sustainable Humanosphere (RISH), and Adaptation and Resilience for a Sustainable/Survivable Society (GCOE-ARS). *The University of Oklahoma:* National Weather Center (NWC) and College of Atmospheric and Geographic Sciences (A&GS), Advanced Radar Research Center (ARRC), and School of Meteorology (SoM).
